Professional Summary

Software Engineer with 3 years of experience designing, developing, and maintaining scalable, high-performance web applications using React.js, Next.js, JavaScript, TypeScript, and Node.js. Experienced in building responsive user interfaces, integrating RESTful APIs, and delivering clean, maintainable, and efficient software solutions. Proficient in CSS/SCSS, database integration, and Agile development practices, with hands-on experience in Azure DevOps for CI/CD pipelines, version control, and collaborative software delivery. Passionate about solving complex engineering challenges, optimizing application performance, and building reliable, user-centric software that adheres to modern development standards.

Work Experience

Software Engineer, Nova Prime Solutions Pvt. Ltd.

11/2023 – Present | Hyderabad, IN

- Developing and enhancing **enterprise-scale** web applications for **PepsiCo** using **React.js, Next.js, TypeScript**, and modern web technologies, delivering scalable, high-performance, and maintainable solutions.
- Collaborating with product owners, designers, backend engineers, and QA teams to deliver **business-critical features**, optimize application performance, and ensure seamless integration across enterprise services.
- Building reusable, responsive, and accessible UI components while **integrating REST APIs** to deliver intuitive and efficient user experiences.
- Optimizing application performance through code splitting, lazy loading, reusable component architecture, and efficient API integration.
- Working in an **Agile** development environment and utilizing **Azure DevOps** for sprint management, CI/CD pipelines, release management, and deployment automation.
- Previously developed custom **e-commerce** web applications for small businesses using React.js, Next.js, TypeScript, and modern UI frameworks.
- Integrated third-party services including **Stripe Payments, Google Maps API, Firebase Authentication, OneSignal Push Notifications, and other RESTful APIs** to enhance application functionality and user engagement.
- Utilized **Git** and **GitHub** for version control, collaborative development, code reviews, and maintaining efficient software delivery workflows.

Software Engineer Intern, Toast, Inc.

08/2022 – 06/2023 | Chennai, IN

- Gained hands-on experience with **C#, ASP.NET, MVC, and .NET Framework**, contributing to internal web applications for employee and access management, including CRUD operations, **role-based access, and authentication**.
- Worked with **RESTful** services and **database integration**, strengthening backend and web fundamentals.
- Joined the **xtraCHEF Red Flags** team to analyze and resolve production issues, improving skills in **debugging, version control, and agile workflows**.

Technical Skills

Frontend:

React.js, Next.js, JavaScript, TypeScript, React Native, Material UI, SCSS/SASS, CSS3

Backend:

Node.js, Express, Python, C#, REST APIs

DevOps & Tools:

Azure DevOps, Azure Portal, Git, GitHub, Postman, VS Code, Windsurf (Devin), Copilot,

Database:

SQL, RDBMS, Azure Blob Storage

Education

Bachelor Of Engineering, Computer Science and Engineering

2019 – 2023

Sri Sai Ram Institute Of
Technology, Chennai, IN

CGPA: **8.98**

Languages

- English
- Tamil
- Hindi

Projects

PepsiCo Global Concentrate Sales, (PGCS)

A large-scale enterprise web platform supporting PepsiCo's global concentrate sales operations, designed to streamline bottler management, product visibility, and ordering workflows with a strong focus on scalability, security, and performance.

- Developed frontend applications using React.js for internal tools and Next.js for customer-facing portals, leveraging AI-assisted development tools to improve development productivity while implementing role-based access, data-driven dashboards, smooth navigation across complex business workflows, and RESTful API integrations for real-time data exchange.
- Implemented enterprise-grade authentication and authorization using Okta, ensuring secure SSO and controlled access aligned with PepsiCo's security standards, and integrations to support end-to-end operational flows.

Custom E-commerce Application, *Partner and Customer*

A scalable e-commerce platform enabling small businesses to launch online stores with rapid deployment and modern commerce capabilities, built responsively with smooth navigation and optimized storefront performance, developed with Next JS, React, MUI, Node.js.

- Implemented secure payment processing, address validation, and real-time shipping features for end-to-end transaction flow, seamless push notifications, user authentication and authorization, with powerful integrations like Stripe, Firebase, OneSignal, and Google Maps SDK.
- Created a dedicated partner app for vendors to manage products, orders, invoices, and storefronts via mobile and contributed to backend services and media handling, including product image uploads, enhancement, and background cleanup using Python AI tools.
- Focused on clean UI architecture, code maintainability, and cross-platform performance across web and mobile.

Xtrachef Red Flags

An internal initiative to eliminate critical bugs in a large-scale enterprise web application used for restaurant and vendor management.

- Analyzed and debugged defects in the XtraChef POS application, applying technical expertise to implement timely and effective resolutions.
- Executed code refactoring to enhance application architecture, resulting in increased stability and performance.

Employee Management System

A full-stack web application developed to manage employee records, roles, payroll, and access levels. Built with C#, ASP.NET, MVC, SQL, REST APIs, React.js, CSS.

- Key features included employee onboarding, role-based authentication, payroll management, attendance tracking, and full CRUD operations.
- Emphasized clean architecture, secure data handling, and seamless API integration between the backend and frontend layers for efficient and scalable performance.

Virtual Game Controller - Windows, using AI head pose estimation

- Developed with Python making use of ML libraries and AI facial point recognitions to detect player's head direction in real-time and mapping it as in-game controls.
- Developed a game using Unity (C#) to adapt to the standalone virtual controller.
- Improved the gaming experience by enabling controller-free gameplay using AI-based head pose estimation.
